April 4th, 2024

Dear Parents/Guardians,

As many of you know, on April 8th, 2024, a total solar eclipse will be crossing over North America. We at the Dunmore School District feel that this astronomical event will provide our students with a unique learning opportunity. Our faculty and staff will be conducting age appropriate lessons and activities that inform students on the Science of the eclipse as well as other concepts that fall within the Earth and Space Science standards.

On this day, for the safety and security of staff and students, there will be no outdoor activities scheduled until the evening. Instead, all activities will take place indoors focusing on the educational activities related to the eclipse. If any parents feel uncomfortable sending their child to school on this day, their student will not be academically penalized for their absence. Students will, as always, have a chance to make up any work missed due to an absence.

As we look forward to this epic event, we are confident that our students will have an informative and enjoyable day as they learn and explore the wonders of science and the eclipse. Thank you for your cooperation and support.

Sincerely,

The Administration Team at the DSD
